

# the prophy range

The largest and most extensive range of prophy brushes, cups, points and prophy angles on the market today.

premium<sup>+</sup>  
plus<sup>™</sup>

# Shanks

A quick guide to the different types of shanks and their advantages.

**CA/RA Metal Shank**  
Most popular style connection

**CA/RA Plastic Shank**  
Versatile and economical shank

**CA/RA Metal Short Shank**  
Designed for greater oral cavity access

**SCREW IN SHANK**  
Provides the most stable vibration free use

Snap-on adaptor not supplied with cups

**SNAP-ON**  
The absence of a shank delivers the most economical & environmentally friendly cup

# Prophy Cups

# Shapes

All our cups are available in regular, soft and extra soft.

### RIBBED & WEBBED CUP

Designed with 4 webs and internal ribs, this cup delivers the optimum amount of prophy paste to help remove stains. The cup also has the ability to “flare” out and therefore reach subgingivally and into interproximal areas.

LATEX AND BPA FREE

### SHORT RIBBED & WEBBED CUP

All the benefits of our standard cups but with its shorter length gives the advantage of greater access in to the oral cavity.

When used in combination with a short shank and mini CA handpiece, the total size of the cup and handpiece head is reduced by over 30%.

Particularly effective for patients with restricted access in the oral cavity or those sensitive to gag reflex.

LATEX AND BPA FREE

### TURBINE BLADE CUP

Designed with nodules on the exterior surface to optimize interproximal polishing, stain and biofilm removal, and thus requiring less pressure and relieving user fatigue. Turbine blades keep paste in the cup reducing splatter whilst still allowing the cup to flare.

LATEX AND BPA FREE

# Colours

The largest range of colours make identifying the grades of hardness simple, whilst adding a splash of colour to the surgery

## SHORT TURBINE BLADE CUP

All the benefits of our standard cups but with its shorter length gives the advantage of greater access in to the oral cavity.

When used in combination with a short shank and mini CA handpiece, the total size of the cup and handpiece head is reduced by over 30%.

Particularly effective for patients with restricted access in the oral cavity or those sensitive to gag reflex.

LATEX AND BPA FREE

## POINT - ORTHODONTIC

Designed for accessing tight or hard to reach areas. Ideal for orthodontic or periodontal procedures where flexibility allows for the most efficient polishing.

The fluted ribs also provide ridges which offer the most effective cleaning and polishing surface.

LATEX AND BPA FREE

Designed to flare to access interproximal & subgingival areas

Exterior nodules polish interproximally and subgingival areas

Easy access to tight interproximal areas

Ideal for orthodontic appliances

# Shanks

A quick guide to the different types of shanks and their advantages.

**CA/RA Metal Shank**  
Most popular style connection

**CA/RA Metal Short Shank**  
Designed to provide greater oral cavity access

**SCREW IN**  
Provides the most stable vibration free use

**SNAP-ON**  
The absence of a shank delivers the most economical & environmentally friendly brush

Snap-on adaptor not supplied with brushes

\*Snap on available in flat & tapered only.  
\*\*Assorted colours unavailable.

# Prophy Brushes

# Shapes

Which shape or size best suits my needs...

1500 - 3000 rpm

## 9MM JUNIOR CUP

Our standard classic shaped nylon bristled brush. The most popular brush for polishing dentition, gold and amalgam fillings

LATEX AND BPA FREE

1500 - 3000 rpm

## 7MM MINI CUP

A smaller version of our popular Junior Cup. All the advantages of the Junior Cup but with greater access in the oral cavity

LATEX AND BPA FREE

1500 - 3000 rpm

## MICRO BRUSH

Designed for reaching areas with limited access, the nylon bristles are perfect for polishing in and around orthodontic appliances, interdental spaces, implants and cavities

LATEX AND BPA FREE

# Colours

The largest range of colours make identifying the brush hardness simple and adds a splash of colour to the surgery

Including Extra Soft which is ideal for work around implants.

## REGULAR BRUSH

\* Individual packs available in white  
\*\* Colours only available in assorted packs

## SOFT BRUSH

\* Individual packs available in clear  
\*\* Colours only available in assorted packs

## EXTRA SOFT BRUSH

\* Individual packs available in yellow  
\*\* Colours only available in assorted packs

1500 - 3000 rpm

## FLAT BRUSH

Our larger flat brush for greater coverage when polishing dentition, gold and amalgam fillings

LATEX AND BPA FREE

1500 - 3000 rpm

## TAPERED BRUSH

Our tapered brush gives greater coverage and the ability to pin point delicate areas on implants and orthodontic appliances

LATEX AND BPA FREE

Junior cup and mini brush are designed for polishing dentition and amalgam fillings

Flat brush easily accesses surfaces and interproximal areas

Micro brush designed to access small, hard to reach areas that need precision

Tapered brush ideal for orthodontic appliances or areas of tight access

# Prophy Angles

Why use a prophy angle?

Prophy angles fit most standard straight handpieces and this eliminates the need to buy expensive purpose built prophy handpieces. They come individually wrapped to improve control and their design prevents the need for disassembling handpieces so as to clean the inner mechanism and gears after use. Prophyl angles save time and this means saving money.

## 360° vs 60° reciprocating

Our standard range of prophy angle cups rotate 360° providing efficient, economical and safe polishing. Our 60° reciprocating heads take efficiency to a new level. They produce no heat and can therefore be used continually, saving time and money. There is no saliva, blood or prophy paste splatter and the lack of motion means no chance of gum or gingiva laceration. Simply a better choice.

## 90° vs 105°

Premium Plus prophy angles are available in two different angled heads: 90° or 105°. Both are ergonomically designed to provide comfortable fatigue free use and have precision crafted gearing to prevent vibration. The choice is yours.

# 60° Reciprocating

Cups available in individual colours or assorted packs

\*\*Brushes available in individual packs of regular white, soft clear or extra soft yellow. Colours available in assorted packs only.
