SUPER COARSE TURBO DIAMOND BURS FG

The *Coarsest* Diamond Available for Bulk Reduction.

SUPER COARSE TURBO DIAMOND BURS incorporate Unimatrix® diamond bonding with stainless shanks. Turbo Diamonds have a diamond free zone or "continual spiral of blank space" which offers several advantages:

- The diamond free zone breaks the surface contact of the instrument at the operative site, allowing water to flow promoting a cooler and cleaner cut. This maximizes cutting efficiency and eliminates excessive heat generation
- Diamond free zones act like flutes on a bur which remove debris from the operative site. Since diamonds cut by grinding versus the chipping action of a carbide, Turbo's will not catch or grab at amalgam or metal
- The continual spiral design of the Turbo Diamonds leaves precise, smooth axial wall preparations
- Turbo Diamonds are available in friction grip (FG) Super coarse only (180µm diamond particle)

Diamond-free cooling zones absorb normal heat generation, resulting in fast reduction while remaining cool.

EC-2009 Easy Chamfer

Optimal deep chamfer preparations - fast - easy - perfect.

The abrasive-free tip facilitates contouring the cervical margin and produces an optimal deep chamfer, which meets the requirements for all-porcelain restorations. This allows optimal deep chamfer preparation, even in the dorsal region of the molars and with restricted mouth opening.

Dr. Dr. Kai D. Haschemian M.sc.

The new conical instruments from NTI found their way into our boxes for preparation instruments right away. Particularly when preparing teeth for all-ceramic restorations, where a neat and clear chamfer is required, we believe there is currently no better instrument on the market.

EC-2011 Easy Chamfer

Optimal deep chamfer preparations - fast - easy perfect.
The conically designed Torpedo has a 6° angle. This meets the recommendations of universities and the requirements of manufacturers of CAD/CAM scanner systems for perfect preparations. The time required during crown preparation is reduced by up to 30%

After having removed the accretion with diamond instruments the root surface is smoothened with periodontal carbide instruments.

EDENTA SOFT TISSUE TRIMMER FG

Tissue Trimmer STT/FG-Shank:
Designed for soft-tissue surgery, the STT ceramic tissue trimmer is a rotary instrument that can be used as an alternative to electrosurgery and surgical blades. The biocompatible hard oxide point is said to cut tissue without burning. Applications include modelling gingiva, opening the sulcus for impression, freeing deep cavities, lacerating inter-radicular granulation-tissue, removing gingival hyperplasia/papillitomas, and exposing intra-osseous implant sections and retained teeth.

Speed: Air turbine 300.000 - 500.00 rpm To be used without any water/spray cooling

NTI PREPARATION SET FOR ZIRCONIA

1859 intraoral set for zirconia

All-ceramic provides top-quality aesthetics. Zirconia abutments are required to achieve the best results in implantology. Optimum adaptation of the abutments to the intraoral situation requires instruments, which enable reliable reduction and prepare the shape of the abutments precisely to the anatomical conditions. Scientific studies prove that it is important to ensure that no corners or edges are prepared during contouring.

The familiar and successful Z-Cut instruments for zirconia have been practically extended in collaboration with Dr. Michael Leistner. This has incorporated Dr. Leistner's many years of experience in the implantology sector with zirconia components. The KR instruments guarantee material-friendly preparation. The high degree of hardness of the special diamonds ensures an excellent cutting performance.

The particularly stable embedding of the grit improves the service life. Sensitivity to temperature is a well-known disadvantage of zircon dioxide.

The UniMatrix® diamond coating ensures perfect flow of cool water and thus prevents temperature-related harm. The instruments can be used both intraorally and extraorally.

Intraoral Trimming of Titanium Abutments

The use of titanium abutments in implant prosthetics requires special instruments for adjustments and adaptation, for example recontouring for adapting the path of insertion of the restoration on the titanium abutments. The tungsten carbide instruments with a coarse cross-cut, which were specially developed for trimming titanium alloys, guarantee optimal contouring of titanium materials (Figure 1). The titanium surfaces are then finished using the congruently shaped red ring finishers (Figure 2).

edenta

GF844 TwoGrit Diamond

Special diamond instrument used for preparing and finishing without changing the instrument when preparing for a veneer. The working section of the TwoGrit diamond instruments consists of two different diamond grits.

The main conical section is coated with coarse diamond grit and the tip with fine diamond grit. The coarse grit enables rapid material removal and the fine diamond grit of the tip guarantees a perfectly finished preparation margin. Speed opt. 70,000 - 140,000 rpm.

EDENTA 5114RA SINTER DIAMOND DISC RA Removing an all-porcelain restoration

To remove an all-porcelain restoration cut the restoration along the length of the axial wall to the centre of the occlusal surface or incisal edge using a sinter diamond disc Order no. 5114RA. Then bend the restoration open with a suitable instrument to make it fracture

For Crown- & Bridge - Metal Separation

- Optimal cutting geometry
- High material reduction
- Virtually vibration-free
- Long term performance

EDENTA C34 TC CROWN SEPARATORS FG

User recommendations

Resin Veneers can be separated directly with the C34 TC Crown Cutter.

Ceramic Veneers must first be removed by a suitable diamond instrument. Thereafter, the metal crown can be separated with the C34 TC Crown Cutter.

Maximum Speed: 120,000 - 160,000 rpm

Speed recommendations: Micromotor: precious metals = 100,000 zupm, Non-precious metals = 100,000 µpm, Air turbine: precious metals = 160,000 µpm, Non-precious metals = unsuitable

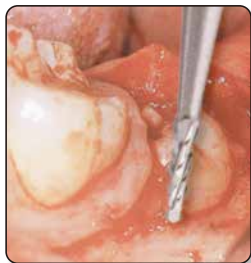

Contact pressure: 0.5 N

EDENTA OSTEOTOM GSD1 SURGICAL DIAMOND BURS FG/RA/HP

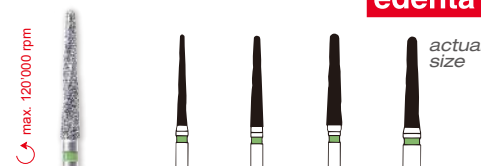

Diamond coated bone cutter for bone incisions, removal and precision finishing. Also ideal for severing tooth roots.

Advantages:

The combination of special shaping and diamond coating results in close contact with bone structure, less heat development as well as a better removal of bone chips and tooth structure.

Always cool the area properly.

NTI SURGERY DIAMOND BURS ROUND RA/HP

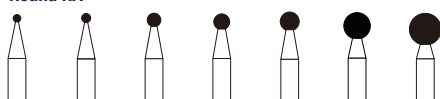

Round diamond burs have been used successfully in surgery for many years. The medium grit size provides the option of use both in gingival contouring, the support area of pontics as well as reliable cutting performance for the window technique. The instruments are available with both a contra-angle shank and also a handpiece shank. This aids precision working. The high quality of the round diamond burs enables reliable preparation and allows repeated use. This ensures cost-effective working.

OrthoFlex Polisher (adhesive remover)

There are several methods used for removal of residual resin after debonding of orthodontic brackets. Therefore, the method of removal of the residual resin is very important to avoid damages on enamel. However, carbide burs are harder than enamel and when used at high speed, can damage the underlying enamel. We recommend using our newly developed OrthoFlex Polisher which produces the finest scratch pattern with the least enamel loss. Advantages of the OrthoFlex polisher: Used for reliable, gentle removal of residual adhesive without damaging the natural tooth structure achieved by a special grit, which despite having a high polishing capacity is not harder than the natural tooth structure. Especially reliable alternative to adhesive or cement residue removal using rotary diamond or metal instruments. After removal of the adhesive the teeth are re-polished using: Exa Cerapol 1 = pre-polishing enamel, 2 = polishing enamel, Cerapol Super 3 = natural high-lustre polish.

H1SNL

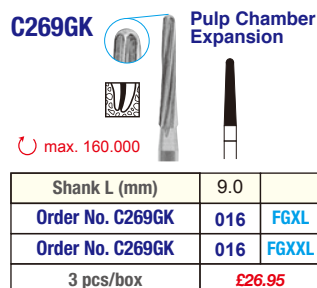

EDENTA HISNL ENDO CARBIDE BURS RAXL

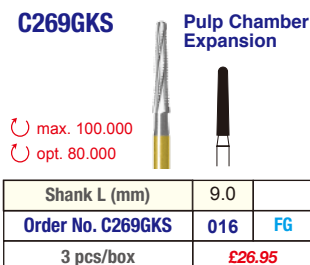

Efficiently cutting special endodontic bur used for detecting all root canals in the case of multirooted teeth. The H1SNL has a particularly high cutting efficiency and its long neck ensures a clear view in deeper regions of the cavity for opening the access cavity of the root canal system. Use in a contra-angle with micromotor at **1,500 - 2,000 rpm**, without cooling, dry and apply only light pressure during preparation.

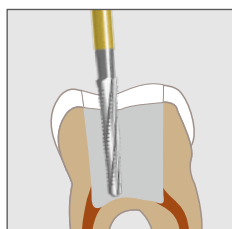

C269GK

C269GKS

EDENTA ENDO ACCESS BURS FG/FGXL/FXXG

Special endodontic bur with a long, conical blade configuration and cross-cut used for preparing a funnel-shaped access in the pulp chamber. The cross-cut guarantees quiet, efficient removal of tooth structure. The rounded, non-cutting bur tip (safe end) prevents penetration into the root canal walls and pulp chamber floor. Application after removal of the pulp chamber roof using the endodontic bur 802L for extending the access opening to ensure successful endodontic treatment.

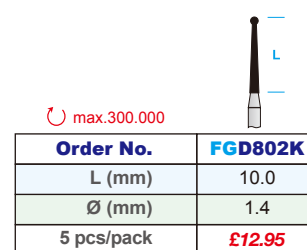

EDENTA ENDO CARBIDE BURS FG/FGXL

H152

Special endodontic drill with a long, conical blade configuration for producing a funnel-shaped access into the pulp chamber. The rounded, safe end drill tip prevents penetration into the root canal walls and the floor of the pulp chamber during drilling. Maximum motor speed **120,000 r.p.m.**, apply only light pressure during preparation.

STODDARD ENDO II DIAMOND BURS FG

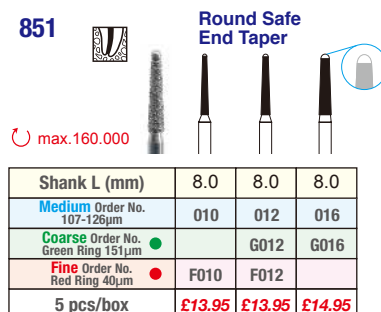

The DIA-ENDO II is a combination of a round and cone shaped diamond which allows access into the pulp chamber and preparation of the chamber walls, in one operation

EDENTA ENDO DIAMOND BURS FG

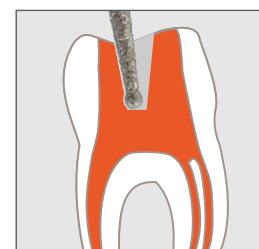

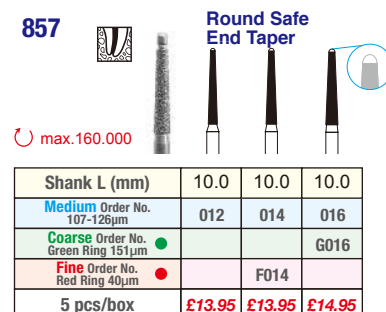

802L

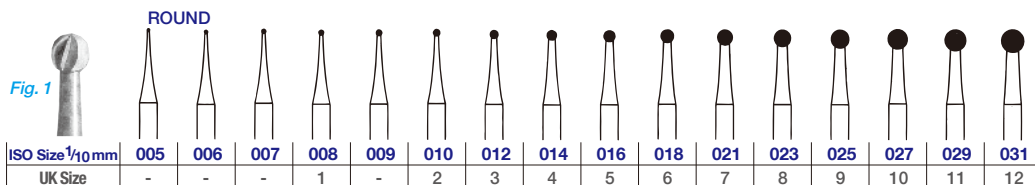

851

857

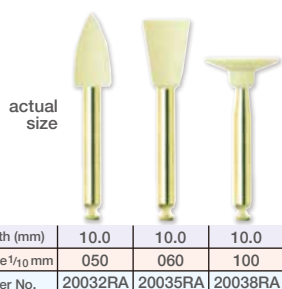

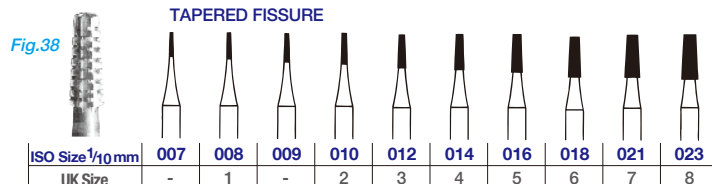

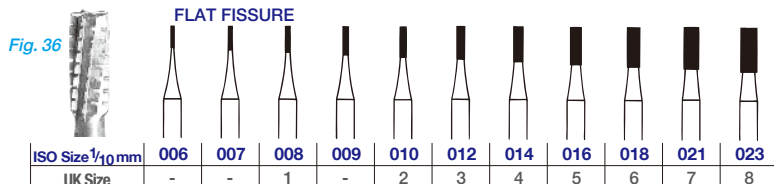

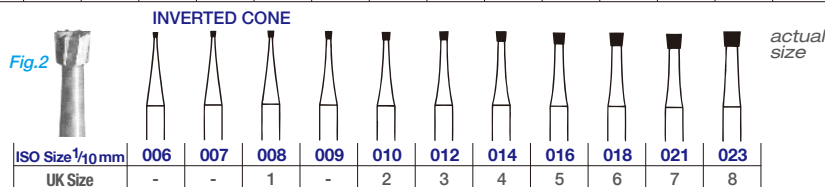

Special endodontic drill for reducing the pulp chamber roof and extending the access opening for successful root canal treatment. The long diamondcoated instrument neck facilitates producing a straight access to the root canal and creating a funnel-shaped access to the pulp chamber. The special diamond grit guarantees rapid and gentle removal of the tooth structure. Speed opt. 120,000 - 160,000 rpm. Apply only light pressure during preparation.

EDENTA STEEL BURS RA

Steel Burs RA, 6 pcs/pack
 Fig 1-2, size 005-023 £3.45
 Fig 1, size 025-031 £5.45
 Fig 36-38, size 006-023 £4.45

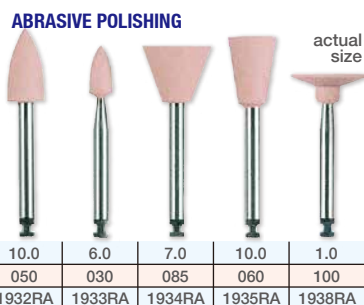

EDENTA TOPGLOSS COMPOSITE POLISHERS RA

for a superior quality surface polish

6 pcs/box ... £29.95

- Applications**
- Polisher with natural diamond grit for an optimum surface polish in only one working stage
 - Specially developed polishing technology for all composite and compomer fillings.
- Advantages**
- Easy to use and time- saving with optimum polishing capacity
 - Reusable, can be sterilized in an autoclave

EDENTA DIAGLOSS COMPOSITE POLISHERS RA DIAMOND IMPREGNATED

Unique **diamond-impregnated** surface treatment system for contouring and high-gloss polishing for composites.

ADVANTAGES

- Eliminates the need for using carbides and diamonds
- Provides an optimum shine on composite, compomer, ceromer
- Time-saving, convenient, 2-step-process

OPERATING INFORMATION

- Speed recommendations: 10,000 -12,000 rpm
- Apply gentle pressure only with circular movement ensuring correct speed
- No need for polishing paste, however wet polish is recommended

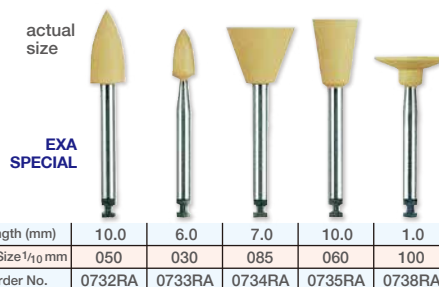

6 pcs/box ... £29.95

EDENTA CERAGLOSS DIAMOND IMPREGNATED CERAMIC POLISHERS RA

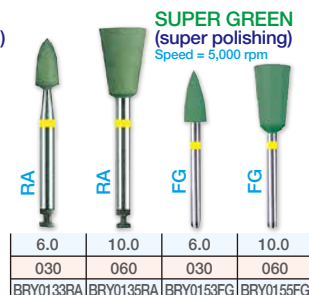

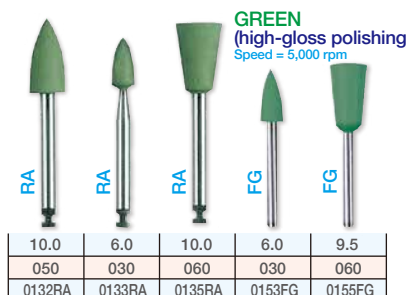

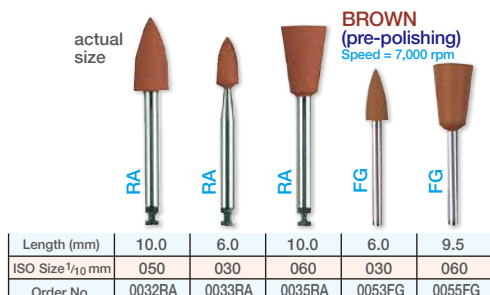

Unique **diamond-impregnated** surface treatment system for high-gloss polishing of surgery ceramics
 Speed: 10,000 - 12,000 rpm

6 pcs/box ... £52.95

EDENTA EXA SPECIAL COMPOSITE POLISHERS RA

The ideal polisher for all micro-filled composites
 speed: 5,000 rpm
 12 pcs/box ... £21.95

STODDARD DIA-COMP POLISHERS RA (3 step)

Prophy Angles

DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES ^{premium plus™}

NO SPLATTER - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our **NEW 60° turn reciprocating** prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

NO HEAT - Our **NEW 60° turn reciprocating** prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

EFFECTIVE - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

FASTER - Thanks to our innovatively designed **NEW 60° turn reciprocating** prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

SAFER - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our **NEW 60° turn reciprocating** prophy angles provide a much safer and pain-free prophylaxis treatment.

WARNING: USE OF THESE 60° TURN RECIPROCATING PROPHY ANGLES IS EXTREMELY ADDICTIVE
Once you've tried them, you will never want to use any other prophy angles again

EDENTA AUTOCLAVABLE DIAMOND FINISHING STRIPS SINGLE SIDE COATED

Applications

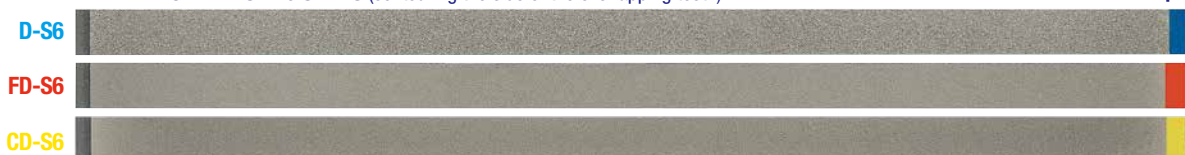

- For contouring the proximal regions of all types of fillings
- Removing excess material from the proximal regions of filling - materials like composites, acrylics, glass ionomer cements and amalgam
- Removing excess cement after placing inlays, onlays and laminate veneers

Advantages

- Contours the proximal regions anatomically, **Length: 147 mm**
- Simplifies working procedures through the serrated edge which separates interdental spaces quickly
- The serrated diamond strips have wider non - diamond coated area, which simplifies sawing
- Serrated sawing edge and diamond - coated abrasive area combined in one instrument simplifies working procedures
- Made of highly stable stainless steel to resist breaking and stretching, for an economical service life

Terms and Conditions

All prices shown are VAT exclusive. All prices, including delivery, special deals and products are subject to change without prior notice. Premium Plus reserves the right to correct errors and omissions in any of our advertising (paper or electronic). Catalogues (prices and specials) will be deemed to be superseded on the issue of the most recent catalogue/ flyer. Goods will not be accepted for return without prior authorisation. Customers must notify Premium Plus of a return within 7 days from the date of delivery. Returned goods received after this time or without prior authorisation may not be accepted. Costs incurred for the return of goods will be at the Customers expense, except in cases of incorrectly supplied or faulty goods. Returned goods must be in a re-saleable condition (inclusive of all original packaging, unopened and unused). Credit accounts are due strictly 30 days from the invoice date. In the event that the Customer fails to pay any monies by the due date, interest may be charged at the rate of 2% interest per month. The Customer is liable for all costs incurred by Premium Plus in the recovery of any debt, including legal fees and any other associated costs. Premium Plus retains ownership of the goods until they are paid in full. Premium Plus shall endeavour to dispatch all orders received before 3pm for either next working day delivery or 1st Class Post dependant on order weight and value. However, delivery dates and times specified are approximate only. Premium Plus cannot guarantee delivery times and will not be held liable or responsible if any timeframes cannot be met. Substitute goods may be supplied when those ordered are unavailable. Equipment warranties are as stated in catalogues/flyers or instructions and are considered void if not used as per instructions, or considered to be mistreated / incorrectly serviced or cared for.

Terms and conditions will be provided prior to opening an account and will be deemed to be accepted once the account has been opened.
