# the mask range

a comprehensive range of  
face masks providing superior  
protection in a large variety of  
colours and patterns

# our type IIR face mask range

Our procedural face masks are CE marked and conform with the requirements of the Medical Device Regulation 2017/745.

## The Premium Plus facial protection range includes:

**2288**  
Type IIR Procedural Face Masks (Ear Loop)

**2288T**  
Type IIR Procedural Face Masks (Tie-On)

**FS2288**  
Type IIR Procedural Face Masks with Shield (Ear Loop)

### OUTER LAYER

Splash resistant non-woven fabric protective layer: effectively blocks visible substances such as droplets. The outer layer is coloured to ensure the user puts the mask on in the correct way.

### MIDDLE LAYER

High density melt-blown filter layer filters potentially infective agents from the user's mouth and nose.

## ultrasonic welding of 3 layers

3-layer filtration system is ultrasonically welded together, which provides added strength to the masks whilst ensuring a comfortable fit for the user.

### INNER LAYER

Polypropylene spunbond non-woven fabric absorbs hot air exhaled from the nose and mouth, keeping the skin dry and comfortable. This ensures users can wear masks comfortably for an extended period of time.

\* Approximate measurements.

## 4-pleat design

The 4-pleat design ensures a comfortable fit for the user by keeping space between the user and the mask, improving breathability.

## BFE efficiency

Bacterial Filtration Efficiency or BFE is a measurement of the medical face mask materials ability to act as a barrier to bacterial penetration. Our face masks have a 99% BFE, which exceeds the BFE standard required under EN 14683:2019 for Type IIR Masks.

## latex free ear loop

Available with ties or elasticated ear loops to ensure a secure fit around the user's face.

## technical data

Our face masks have been subject to thorough testing by an independent laboratory. The results of this testing is shown below:

EUROPEAN STANDARD EN 14683:2019				
	Bacterial Filtration Efficiency (%)	Differential Pressure (Pa/cm <sup>2</sup> )	Fluid Resistance (kPa)	Microbial Cleanliness (cfu/g)
Premium Plus Type IIR	≥ 99	< 45	21.3	< 4
Type IIR	≥ 98	< 60	≥ 16.0	≤ 30
Type II	≥ 98	< 40	Testing not required.	≤ 30
Type I	≥ 95	< 40	Testing not required.	≤ 30

AMERICAN STANDARD ASTM F2100-19					
	Bacterial Filtration Efficiency (%)	Particulate Filtration Efficiency @0.1μ (%)	Differential Pressure (mmH <sub>2</sub> O/cm <sup>2</sup> )	Fluid Resistance (mmHg)	Flammability
Premium Plus Level 3	≥ 99	≥ 99	< 4.5	160	Class 1
Level 3	≥ 98	≥ 98	< 6.0	160	Class 1
Level 2	≥ 98	≥ 98	< 6.0	120	Class 1
Level 1	≥ 95	≥ 95	< 5.0	80	Class 1

# type IIR ear loop masks

Type IIR - EN 14683 rated masks are high-performance face masks suitable for clinical settings to protect the patient and working environment from infective agents and to prevent cross contamination. The melt-blown polymer material used in the middle layer of the mask is a highly effective filter which prevents micro-droplets exiting the masks. Our 4-pleat design allows the wearer to comfortably expand the mask to fully cover the area from nose to chin for improved breathability. The inner layer of the masks is made of an ultra-soft non-irritating fabric, for excellent user comfort.

- Our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- Available in blue, green, pink, lavender or black
- Also available with tie-on (see page 6)
- Effective 3-layer protection designed to filter infective agents.
- Latex free
- Single use only

## STANDARD COLOURS

## PATTERNS

## type IIR black face masks

### your favourite ear loop mask, now in black

Our best-selling ear loop mask, now available in black. This stylish mask is suitable for health professionals looking for aesthetic facial protection in clinical or other sterile environments (such as tattoo parlours or nail and beauty salons). Our new black face masks have the same high-performance qualities of our other ear loop masks, with a white inner layer to indicate to users which way the mask should be worn.

4 PLEAT DESIGN

BLACK OUTER LAYER

- Our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- Available with elastic ear loop fastenings only
- 4-pleat design follows the curve of the face for improved breathability and comfort
- Latex free
- Single use only

## type IIR tie-on masks

Tie-on masks are a convenient alternative to our ear loop masks. Tie-on masks are suitable for both patients and health professionals who experience discomfort or fatigue from wearing earloop masks. The 4 ultrasonically welded ties are designed to be tied horizontally behind the user's head, providing a more customised secure fitting.

- Our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- Available in blue, green, pink or lavender
- Available with tie-on fastenings
- Effective 3-layer protection designed to filter infective agents
- Latex free
- Single use only

## type IIR ear loop masks with shield

Our Type IIR face mask with shield provides the same high-performance protection as our normal procedural masks, with the benefit of a plastic shield which is attached to the outer surface of the mask. The shield provides added protection for the user's face and eyes against splashes and droplets.

- Our procedure masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- Available in blue, green, pink or lavender
- Available with elastic ear loop fastenings
- Effective 3-layer protection designed to filter infective agents
- Latex free
- Single use only

Tied horizontally behind head.

Shields and protects the front of the face.
