the mask range

a comprehensive range of
face masks in a large variety
of colours and patterns

our type IIR face mask range

Infection control is a top priority in medical and dental settings, where effective personal protective equipment plays a crucial role in ensuring safety.

Our CE-marked Type IIR procedural face masks, compliant with the Medical Device Regulation 2017/745, provide reliable bacterial filtration and splash resistance, helping to reduce contamination risks in professional environments.

reliable protection for medical and dental professionals

In healthcare and dental environments, reliable protective equipment is essential to minimize exposure to fluids and airborne contaminants. Type IIR face masks are specifically designed to provide splash resistance, ensuring a strong defense against potential infection risks. With a breathable, multi-layer construction, they combine protection with all-day comfort, making them a trusted choice for professionals in clinical settings.

comfortable and practical design for various needs

Our Type IIR masks come in three specialized designs: Ear Loop for quick, secure wear, Tie-On for adjustable comfort, and Face Shield for enhanced splash protection. The coloured outer layer ensures correct usage, while the splash-resistant non-woven fabric blocks visible droplets.

Available in a variety of colours and patterns, they offer both reliable protection and a professional appearance. Lightweight and breathable, all versions prioritize safety and comfort in demanding medical and dental settings.

with Shield (Ear Loop)

ultrasonic welding of 3 layers

3-layer filtration system is ultrasonically welded together, which provides added strength to the masks whilst ensuring a comfortable fit for the user.

outer layer

Splash resistant non-woven fabric protective layer: effectively blocks visible substances such as droplets. The outer layer is coloured to ensure the user puts the mask on in the correct way.

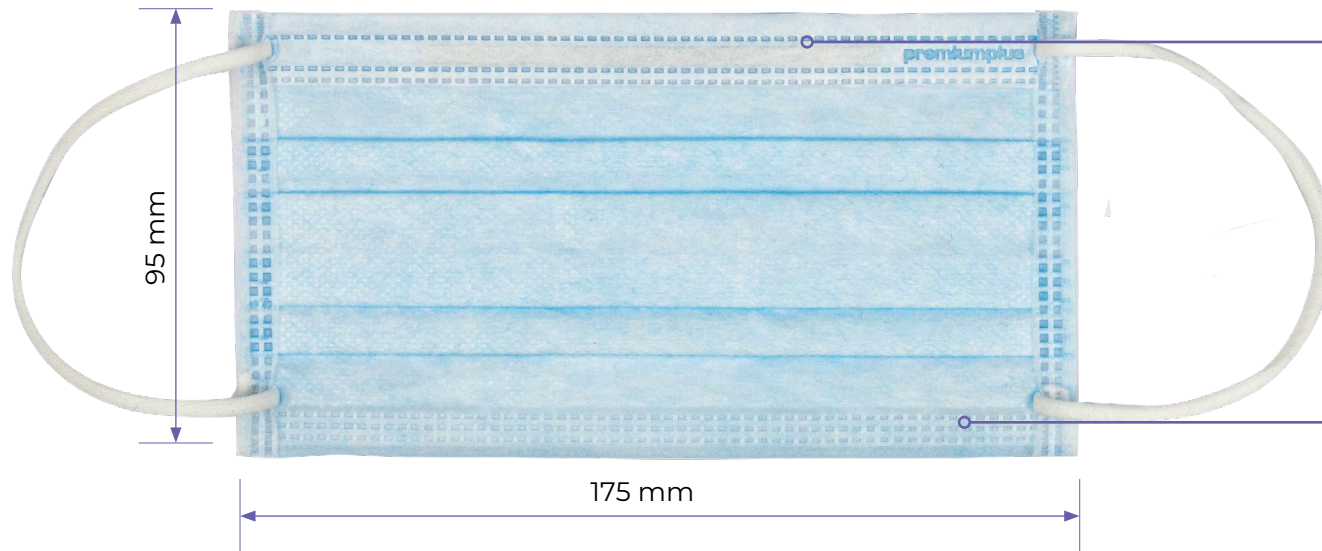

middle layer

High density melt-blown filter layer filters potentially infective agents from the user's mouth and nose.

inner layer

Polypropylene spunbond non-woven fabric absorbs hot air exhaled from the nose and mouth, keeping the skin dry and comfortable. This ensures users can wear masks comfortably for an extended of time.

4-pleat design

The 4-pleat design ensures a comfortable fit for the user by keeping space between the user and the mask, improving breathability.

latex free ear loop

Available with ties or elastically ear loops to ensure a secure fit around the user's face.

BFE efficiency

Bacterial Filtration Efficiency or BFE is a measurement of the medical face mask materials ability to act as a barrier to bacterial penetration. Our face masks have a 99% BFE, which exceeds the BFE standard required under EN 14683:2019 for Type IIR Masks.

technical data:

Our face masks have been subject to thorough testing by an independent laboratory. The results of this testing is shown below:

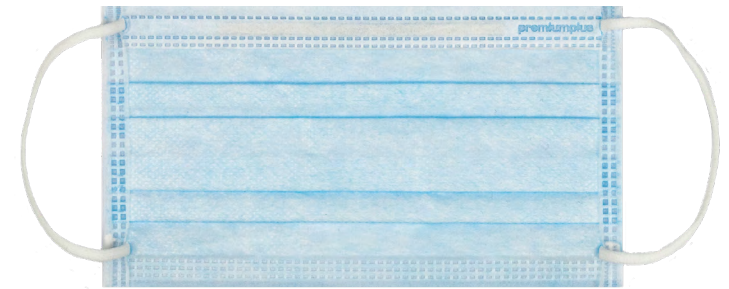

EUROPEAN STANDARD EN 14683:2019				
	Bacterial Filtration Efficiency (%)	Differential Pressure (Pa/cm ²)	Fluid Resistance (kPa)	Microbial Cleanliness (cfu/g)
Premium Plus Type IIR	≥ 99	< 45	21.3	< 4
Type IIR	≥ 98	< 60	≥ 16.0	≤ 30
Type II	≥ 98	< 40	Testing not required.	≤ 30
Type I	≥ 95	< 40	Testing not required.	≤ 30

AMERICAN STANDARD ASTM F2100-19					
	Bacterial Filtration Efficiency (%)	Particulate Filtration Efficiency @0.1μ (%)	Differential Pressure (mmH ₂ O/cm ²)	Fluid Resistance (mmHg)	Flammability
Premium Plus Level 3	≥ 99	≥ 99	< 4.5	160	Class 1
Level 3	≥ 98	≥ 98	< 6.0	160	Class 1
Level 2	≥ 98	≥ 98	< 6.0	120	Class 1
Level 1	≥ 95	≥ 95	< 5.0	80	Class 1

type IIR ear loop masks

Type IIR - EN 14683 rated masks are high-performance face masks suitable for clinical settings to protect the patient and working environment from infective agents and to prevent cross contamination. The melt-blown polymer material used in the middle layer of the mask is a highly effective filter which prevents micro-droplets exiting the masks. Our 4-pleat design allows the wearer to comfortably expand the mask to fully cover the area from nose to chin for improved breathability. The inner layer of the masks is made of an ultra-soft non-irritating fabric, for excellent user comfort.

- our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- available in blue, green, pink, lavender or black
- available in various patterns
- also available with tie-on (see page 8)
- effective 3-layer protection designed to filter infective agents.
- latex free
- single use only

2288 black

Our best-selling ear loop mask, now available in black. This stylish mask is suitable for health professionals looking for aesthetic facial protection in clinical or other sterile environments (such as tattoo parlours or nail and beauty salons). Our new black face masks have the same high-performance qualities of our other ear loop masks, with a white inner layer to indicate to users which way the mask should be worn.

- our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- available with elastic ear loop fastenings only
- 4-pleat design follows the curve of the face for improved breathability and comfort
- latex free
- single use only

type IIR tie-on masks

Tie-on masks are a convenient alternative to our ear loop masks. Tie-on masks are suitable for both patients and health professionals who experience discomfort or fatigue from wearing earloop masks. The 4 ultrasonically welded ties are designed to be tied horizontally behind the user's head, providing a more customised secure fitting.

- our procedural masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- available in blue, green, pink or lavender
- available with tie-on fastenings
- effective 3-layer protection designed to filter infective agents
- latex free
- single use only

type IIR ear loop masks with shield

Our Type IIR face mask with shield provides the same high-performance protection as our normal procedural masks, with the benefit of a plastic shield which is attached to the outer surface of the mask. The shield provides added protection for the user's face and eyes against splashes and droplets.

- our procedure masks adhere to European Standard EN 14683:2019 and ASTM F2100-19
- available in blue, green, pink or lavender
- available with elastic ear loop fastenings
- effective 3-layer protection designed to filter infective agents
- latex free
- single use only
