Who are we?

Why choose us?

Whether supplying our own Premium Plus brand, private label or OEM solutions, we deliver quality without compromise.

By combining development, manufacturing, regulatory management, artwork, packaging and warehousing under one partner, we simplify the process, reduce compliance risk and speed up time to market - giving our clients confidence from concept to launch.

Beyond production, we provide marketing ready support. From compliant artwork and packaging to product positioning and launch assistance, we help ensure products are not only approved but built to sell.

At **Premium Plus**, we specialise in the design and manufacture of high quality dental products. Our mission is to turn dental into a positive joyful experience for patients, practises and distributors and we are driven by our unwavering belief that a bright, healthy smile has the ability to uplift your entire day.

Through continuous innovation, research and investment in advanced manufacturing, combined with over 40 years of experience in the dental industry, we have learned how to refine and improve every step of the manufacturing process. This end to end control gives our customers a clear advantage: consistent quality, dependable performance and reliable supply they can trust.

With a global perspective on the dental market and a deep understanding of regional requirements, we are able to consistently exceed customer expectations. This is in part due to our centrally located European warehouse, in the city of Poznań, Poland - that ensures efficient distribution and responsive service across international markets.

What do we make?

Over the past decade our range has increased to cover small equipment and the majority of plastic and paper disposable dental products. This gives us, and more importantly you, the ability to offer a huge range that includes LED curing lights, apex locators, handpieces, disposable prophy cups and angles, micro applicators, syringe tips, barrier sleeves, saliva ejectors and suction tubes etc.

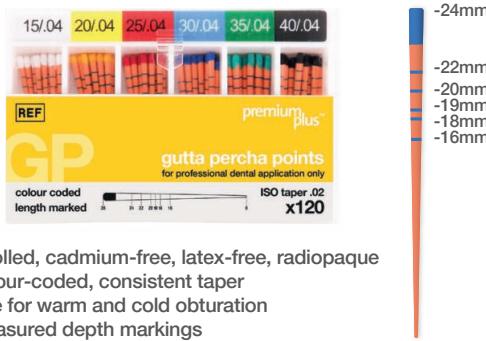

Where are we?

Premium Plus now supplies to over 90 countries and regions throughout the world and has distribution partners in Poland, United Kingdom, Australia, USA, Japan and Hong Kong. The manufacturing site in Dongguan, China is constantly working on not only maintaining but exceeding the standards set by ISO, CE and FDA. We are proud of the fact that we hold **ISO 13485:2016** certification for the **Quality Management System of Medical Devices** and have all of the class IIa products manufactured by us certified with the **CE0123** mark by **TUV SUD**. We know that with our experience, our integrated range of production processes and our ever-expanding range we have the ability to cover all our customers' requirements.

12 MONTH WARRANTY

A different microcure accessory cap to cover every need.

a. Endo Guide Lens

The mini light guide is suitable for curing apex position of the tooth and other limited areas.

b. 3.0 mm Microcure Ball Lens

Facilitates the building of convex proximal contacts. The imprint is easily filled with composite in a second step, push the Microcure Ball Lens against the interproximal wall of the band, do not submerge in composite.

c. 2.2 mm Microcure Ball Lens

Facilitates the building of convex proximal contacts. The imprint is easily filled with composite in a second step, push the Microcure Ball Lens against the interproximal wall of the band, do not submerge in composite.

d. Microcure Lens

It provides pinpoint curing of small composites and is helpful for tack curing veneers.

Caries Detection

Purple light for 30 or 60 seconds for detecting caries, calculus and cracked teeth.

The carbolite helps detect caries by emitting specific wave lengths that induce different fluorescence in healthy and decayed dental tissue. This allows dentists to visually distinguish between healthy enamel and carious lesions.

High Grade Milled Aluminium Body

Ensures superior strength, durability, and effective heat dissipation. Its sleek, slim design and optimal weight make the handpiece practical, easy to handle and exceptionally comfortable to use.

10 mm Head

Our ergonomically designed 10mm head produces an output of up to 3000 mW/cm² and a dual wave length of 385-515 nm. Powerful enough to cure in seconds, the full range of the most popular light cured products on the dental market today.

Customized LED chip and filters produce a collimated output that maintains a consistent curing beam.

An inbuilt light indicator to keep track of the radiance of the curing light on an easy to read OLED screen.

C01-M / C02-M Mini Curing Lights

- 360° Rotatable tips
- Automatic compensation circuit for constant power output
- Fully covered membrane panel for easy cleaning and infection control
- Light weight: approx. 85 gms
- Dual modes: FULL / SOFT
- 12 Operation times

SOFT	15 seconds	4.6 mm	2.30 mm	15 seconds	4.8 mm	2.40 mm

REMARKS: Above data is based on test results using an A2 shade composite. The light tip was placed above and pointed perpendicular to the composite. Tests were done as per ISO 4049 Standard. The samples were measured and the data was divided by two (50% of the total composite depth cured). ISO 4049 Standard requires that the results for class II restorative materials should be at least 1.5 mm for non-opaque shades and 1.0 mm for opaque shades. All resins and composites have different curing times. It is recommended that you should test your resins and composites performance to determine the curing times required.

C03-B BASIC CURE LED CURING LIGHT

with direct light source

- **Unbeatable Value**

High-performance curing light with advanced features at a budget-friendly price.

- **Four Versatile Modes**

Tailored modes to meet every clinical need, from quick curing, orthodontics and general applications.

- **Dual Wavelength Technology**

Effectively cures all composite materials on the market.

- **Compact Low-Profile Head**

Easily reaches hard-to-access areas, ensuring precision and ease of use.

- **LED Display**

Provides clear, real-time information for seamless operation.

- **Convenient Charging Base**

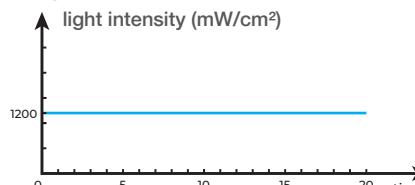

Always charged and ready to use

- **Constant Power Output**

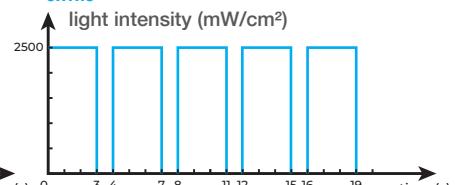

Automatic compensation circuit ensures consistent performance, even with a low battery.

Prophy Angles

DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES

NO SPLATTER - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our **NEW 60° turn reciprocating** prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

NO HEAT - Our **NEW 60° turn reciprocating** prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

EFFECTIVE - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

FASTER - Thanks to our innovatively designed **NEW 60° turn reciprocating** prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

SAFER - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our **NEW 60° turn reciprocating** prophy angles provide a much safer and pain-free prophylaxis treatment.

Welcome to our new **Greenline**

We believe that making simple changes to the everyday products you purchase is the easiest way to help our planet.

This range is our first step towards offering you the choice of more environmentally friendly products.

Greenline bamboo cups

- Leakproof construction, non-slip design
- Dispenses easily from cup dispenser due to their rolled lip
- Conveniently designed 170ml (6oz) size

**Looking to cut down on plastic use?
Switching to bamboo cups is a simple
and easy change that can have a big
impact on reducing plastic waste in
your surgery.
Here are some reasons to make the
switch to using bamboo:**

*Bamboo Cups 170 ml (6 oz), 1000 pcs/box
6800BB Blank
6800BH Healthy Teeth (4 assorted designs)*

- 1 Bamboo is the world's quickest growing plant and provides a sustainable source of material. When bamboo is cut down to make paper, it is able to quickly recover to be harvested again.
- 2 Bamboo absorbs a large amount of CO₂ as it grows, which helps to offset human carbon emissions.
- 3 Our Greenline outer carton is 100% recyclable.

DISPOSABLE HEALTHY TEETH PAPER CUPS

- Leakproof construction, non-slip design
- Dispenses easily from cup dispenser due to their rolled lip
- Fun way to promote dental health to patients

6800HT Paper Cups 170 ml (6 oz), 1,000 pcs/box

Greenline air-water syringe tips

Reusable products are a great idea.

Unfortunately, trying to clean the inside of a reusable metal air-water syringe tip is just not possible and if you can't clean it, you can't guarantee the effectiveness of its sterilisation. This means that using a disposable plastic air-water syringe tip is the only way to guarantee avoiding cross contamination.

- Directly interchangeable with American type syringe tips (long), or European syringes which have been converted to use American type syringe tips (short)
- Made from 100% recycled plastic
- No sharp edges for patient comfort
- Unique quad air core design to ensure dry air
- Cardboard packaging which is easily recyclable

Greenline Air-water Syringe Tips 200 pcs/box

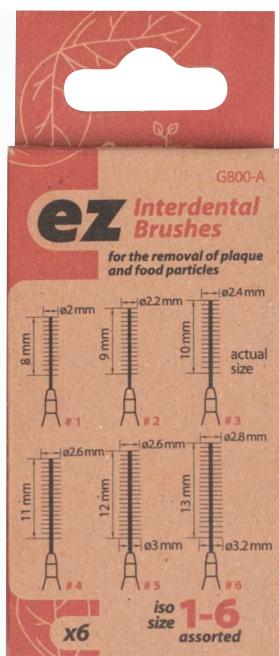

G-018 (American Type)

G-028 (European Type)

1 Our Greenline air-water syringe tips are made from 100% recycled plastic, using waste materials left over from our other manufacturing processes.

2 The Greenline air-water syringe tips are packaged in 100% recyclable cardboard boxes, instead of large plastic bags, helping to reduce the amount of plastic packaging in your surgery.

ez interdental brushes

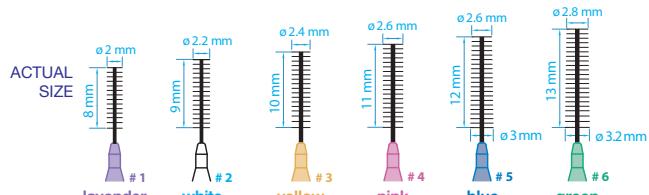

- ISO size (colour coded)
- Latex and BPA free
- Reusable
- Cardboard box
- Non-slip, easy grip design
- Small, compact and easy to carry

Interdental Brushes, ISO Size No. 1-6
Single or Assorted Sizes, 6 pcs/box

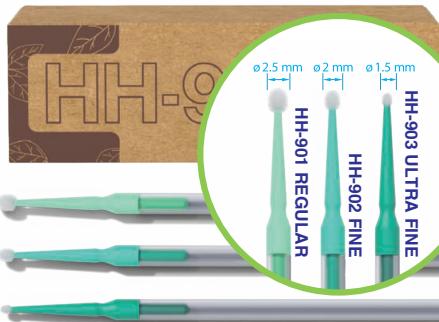

1 We have designed the shape of our handle to be small and practical in size, so that it uses up to 65% less plastic than other leading brands

2 Instead of using new plastic, we use 100% recycled plastic for the brush handle and 50% recycled plastic for the protective cap. This recycled plastic is made using waste materials left over from other manufacturing processes.

3 Unlike some other brands who package interdental brushes in unnecessarily large plastic boxes and bags, we use a cardboard box which is 100% plastic free and easily recyclable

HOLLOW HANDLE micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

Hollow Handle Micro Applicators 100 pcs/box

(Length 100 mm, dia 3 mm handles)

HH-901 Regular (dia. 2.5 mm) Light Green

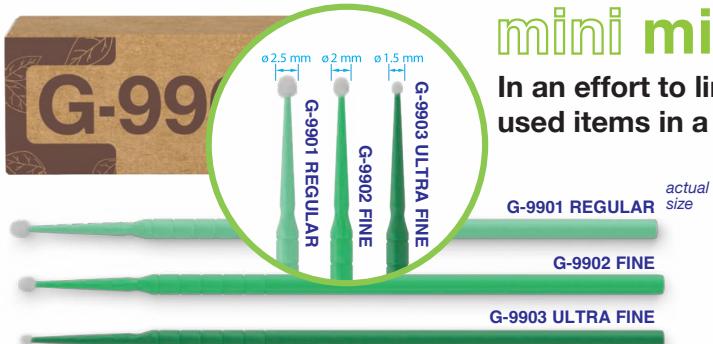

HH-902 Fine (dia. 2 mm) Medium Green

HH-903 Ultra Fine (dia. 1.5 mm) Dark Green

1 45% less plastic used in each hollow handle applicator than our standard micro applicator, due to the hollow design of the handle.

2 Instead of using new plastic, we use 100% recycled plastic for the brush tip and 50% recycled plastic for the hollow handle. This recycled plastic is made using waste materials left over from our other manufacturing processes.

3 No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

mini micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Bends into any angle for the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.

Mini Micro Applicators 100 pcs/box

(Length 85 mm, dia 2.5 mm handles)

G-9901 Regular (dia. 2.5 mm) Light Green

G-9902 Fine (dia. 2 mm) Medium Green

G-9903 Ultra Fine (dia. 1.5 mm) Dark Green

1 We designed the handle to be a smaller, more practical size that reduces the amount of plastic used by 50% in comparison to our standard micro applicators.

2 Instead of new plastic, we used 100% recycled plastic. This recycled plastic is made using waste materials from our other manufacturing processes.

3 No more plastic tube that can use up to a third of the amount of plastic as the actual product - just a 100% recyclable box.

micro applicator tips

Our most environmentally friendly micro applicators:

1 By using a micro applicator tip with a reusable handle, you can reduce the amount of plastic that you would normally use by 80% when compared to a standard micro applicator.

2 Using an autoclavable handle saves plastic. Clean it, autoclave it and re-use it. Simple and effective.

3 Our micro applicator tips are packaged in a 100% recyclable cardboard box. Recycling can prevent pollution by reducing the need to collect new raw materials.

4 Instead of using new plastic for the micro applicator tips, we use 100% recycled plastic. The recycled plastic is made using waste materials from our other manufacturing processes.

- For the placement of small controlled amounts of material in limited access areas.
- Economical - saving up to 80% by the reduction of excess materials used.
