A different microcure accessory cap to cover every need.

a. Endo Guide Lens

The mini light guide is suitable for curing apex position of the tooth and other limited areas.

b. 3.0 mm Microcure Ball Lens

Facilitates the building of convex proximal contacts. The imprint is easily filled with composite in a second step, push the Microcure Ball Lens against the interproximal wall of the band, do not submerge in composite.

c. 2.2 mm Microcure Ball Lens

Facilitates the building of convex proximal contacts. The imprint is easily filled with composite in a second step, push the Microcure Ball Lens against the interproximal wall of the band, do not submerge in composite.

d. Microcure Lens

It provides pinpoint curing of small composites and is helpful for tack curing veneers.

Caries Detection

Purple light for 30 or 60 seconds for detecting caries, calculus and cracked teeth.

The carbolite helps detect caries by emitting specific wave lengths that induce different fluorescence in healthy and decayed dental tissue. This allows dentists to visually distinguish between healthy enamel and carious lesions.

High Grade Milled Aluminium Body

Ensures superior strength, durability, and effective heat dissipation. Its sleek, slim design and optimal weight make the handpiece practical, easy to handle and exceptionally comfortable to use.

10 mm Head

Our ergonomically designed 10mm head produces an output of up to 3000 mW/cm² and a dual wave length of 385-515 nm. Powerful enough to cure in seconds, the full range of the most popular light cured products on the dental market today.

Customized LED chip and filters produce a collimated output that maintains a consistent curing beam.

An inbuilt light indicator to keep track of the radiance of the curing light on an easy to read OLED screen.

REMARKS: Above data is based on test results using an A2 shade composite. The light tip was placed above and pointed perpendicular to the composite. Tests were done as per ISO 4049 Standard. The samples were measured and the data was divided by two (50% of the total composite depth cured). ISO 4049 Standard requires that the results for class II restorative materials should be at least 1.5 mm for non-opaque shades and 1.0 mm for opaque shades. All resins and composites have different curing times. It is recommended that you should test your resins and composites performance to determine the curing times required.

Prophy Angles

DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES

NO SPLATTER - The centrifugal force generated by a normal 360° turn prophy angle results in splattering and mess. Our **NEW 60° turn reciprocating** prophy angles eliminates potential splattering of prophy paste, blood and saliva, keeping the prophy paste in the cup where it belongs.

NO HEAT - Our **NEW 60° turn reciprocating** prophy angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

EFFECTIVE - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

FASTER - Thanks to our innovatively designed **NEW 60° turn reciprocating** prophy angles, the prophy cup or brush can be used continuously on the tooth surface, saving valuable chair time.

SAFER - The rotational motion of traditional prophy cups and brushes can cause laceration and bleeding of the gums. Our **NEW 60° turn reciprocating** prophy angles provide a much safer and pain-free prophylaxis treatment.

Welcome to our new Greenline

We believe that making simple changes to the everyday products you purchase is the easiest way to help our planet.

This range is our first step towards offering you the choice of more environmentally friendly products.

Greenline bamboo cups

- Leakproof construction, non-slip design
- Dispenses easily from cup dispenser due to their rolled lip
- Conveniently designed 170ml (6oz) size

Looking to cut down on plastic use? Switching to bamboo cups is a simple and easy change that can have a big impact on reducing plastic waste in your surgery. Here are some reasons to make the switch to using bamboo:

Bamboo Cups 170 ml (6 oz), 1000 pcs/box
6800BB Blank
6800BH Healthy Teeth (4 assorted designs)

- 1 Bamboo is the world's quickest growing plant and provides a sustainable source of material. When bamboo is cut down to make paper, it is able to quickly recover to be harvested again.
- 2 Bamboo absorbs a large amount of CO₂ as it grows, which helps to offset human carbon emissions.
- 3 Our Greenline outer carton is 100% recyclable.

DISPOSABLE HEALTHY TEETH PAPER CUPS

- Leakproof construction, non-slip design
- Dispenses easily from cup dispenser due to their rolled lip
- Fun way to promote dental health to patients

6800HT Paper Cups 170 ml (6 oz), 1,000 pcs/box

Greenline air-water syringe tips

Reusable products are a great idea. Unfortunately, trying to clean the inside of a reusable metal air-water syringe tip is just not possible and if you can't clean it, you can't guarantee the effectiveness of its sterilisation. This means that using a disposable plastic air-water syringe tip is the only way to guarantee avoiding cross contamination.

- Directly interchangeable with American type syringe tips (long), or European syringes which have been converted to use American type syringe tips (short)
- Made from 100% recycled plastic
- No sharp edges for patient comfort
- Unique quad air core design to ensure dry air
- Cardboard packaging which is easily recyclable

Greenline Air-water Syringe Tips 200 pcs/box
G-018 (American Type)
G-028 (European Type)

1 Our Greenline air-water syringe tips are made from 100% recycled plastic, using waste materials left over from our other manufacturing processes.

2 The Greenline air-water syringe tips are packaged in 100% recyclable cardboard boxes, instead of large plastic bags, helping to reduce the amount of plastic packaging in your surgery.

HOLLOW HANDLE micro applicators

In an effort to limit the environmental effect of one of the most used items in a dental surgery we came up with some great ideas:

- Economical - saving up to 80% by the reduction of excess materials used.

Hollow Handle Micro Applicators 100 pcs/box
(Length 100 mm, dia 3 mm handles)
HH-901 Regular (dia. 2.5 mm) Light Green
HH-902 Fine (dia. 2 mm) Medium Green
HH-903 Ultra Fine (dia. 1.5 mm) Dark Green

- 1 45% less plastic used in each hollow handle applicator than our standard micro applicator, due to the hollow design of the handle.
